

# SPARK Client Certificate installation manual

## For Mozilla Firefox – Linux

### Error Page

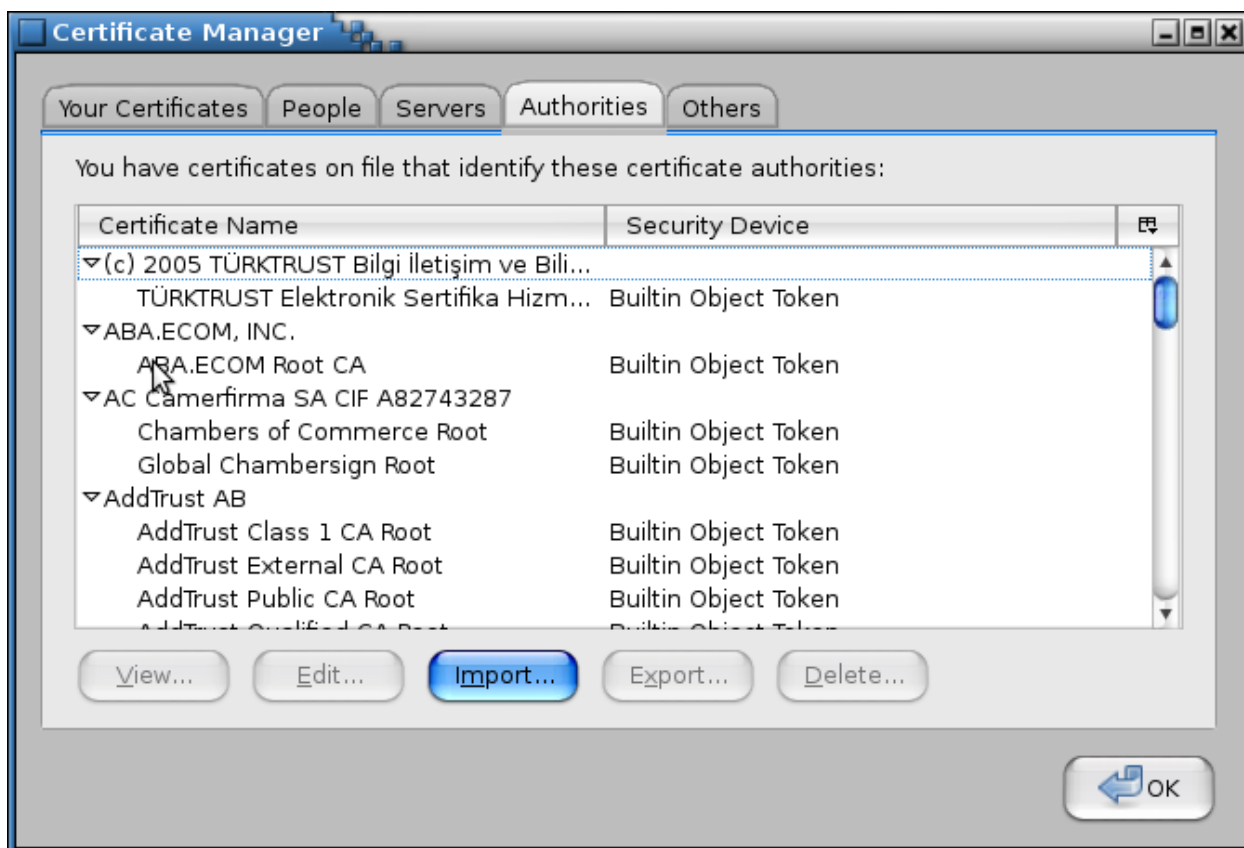

#### Steps

1. Download Certificates from **http://www.spark.gov.in/certchain.zip** and extract it to a folder
2. Open Mozilla FireFox and select **Edit** → **Preferences**

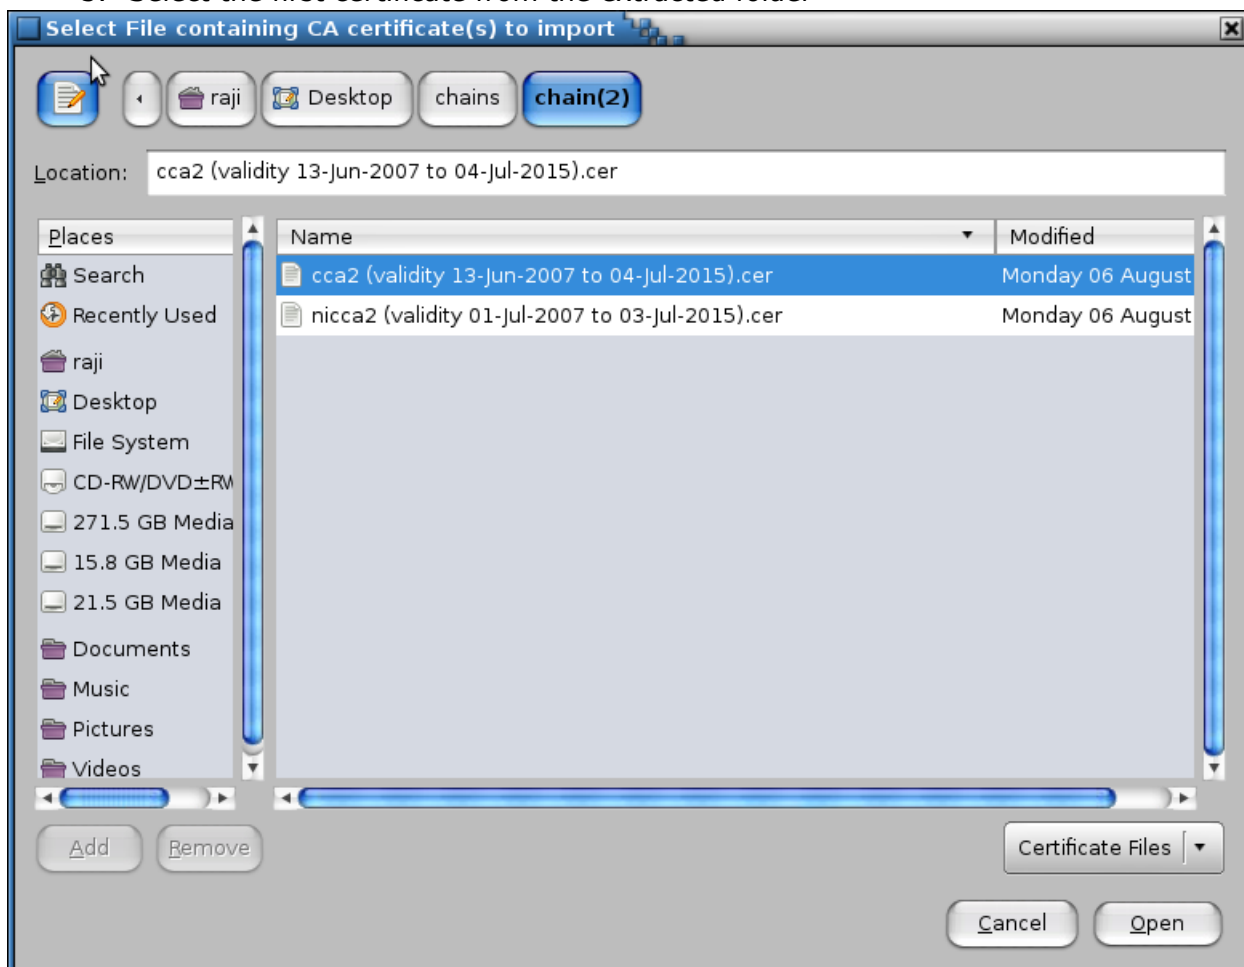

3. Select **Advanced** → **Encryption** and click on **View Certificate**

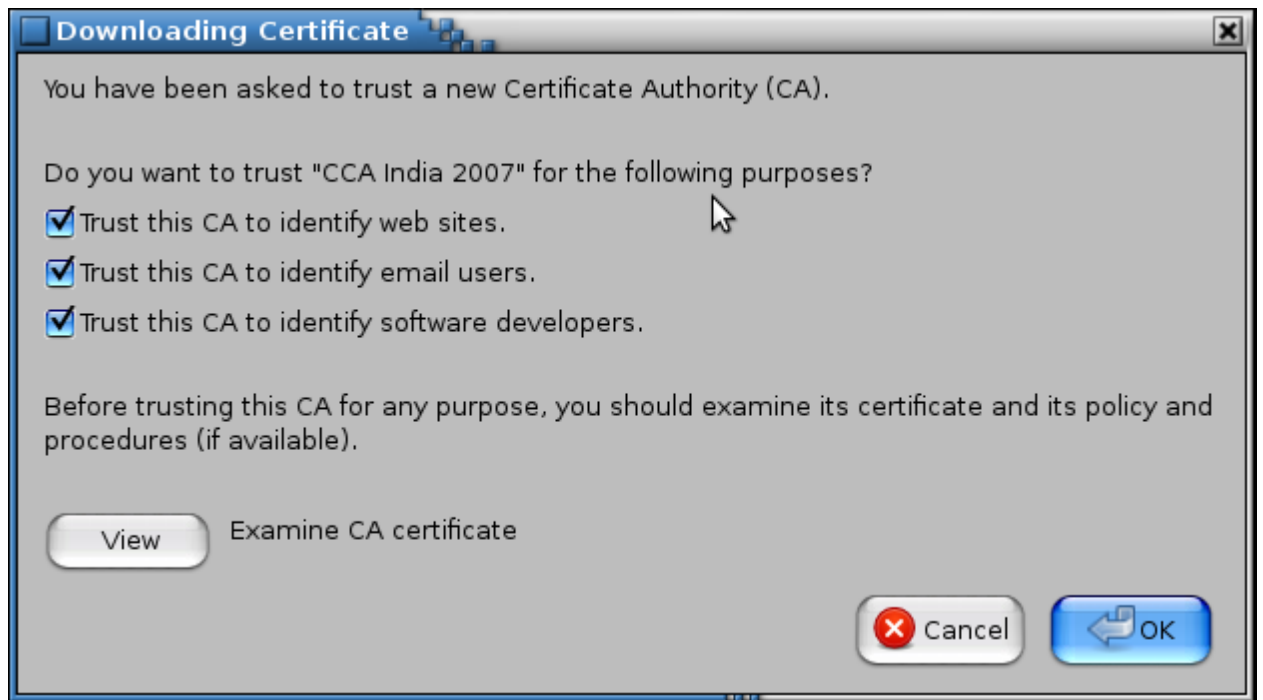

4. Select **Authorities** and click on **Import** button

5. Select the first certificate from the extracted folder

6. Check all the three check boxes and Click on **OK** Button

7. Repeat steps 3 to 6 to install the second certificate file.
8. Certificate Installation completed.  
Now you can access SPARK using Security Certificate
