

SPARK Client Certificate installation manual

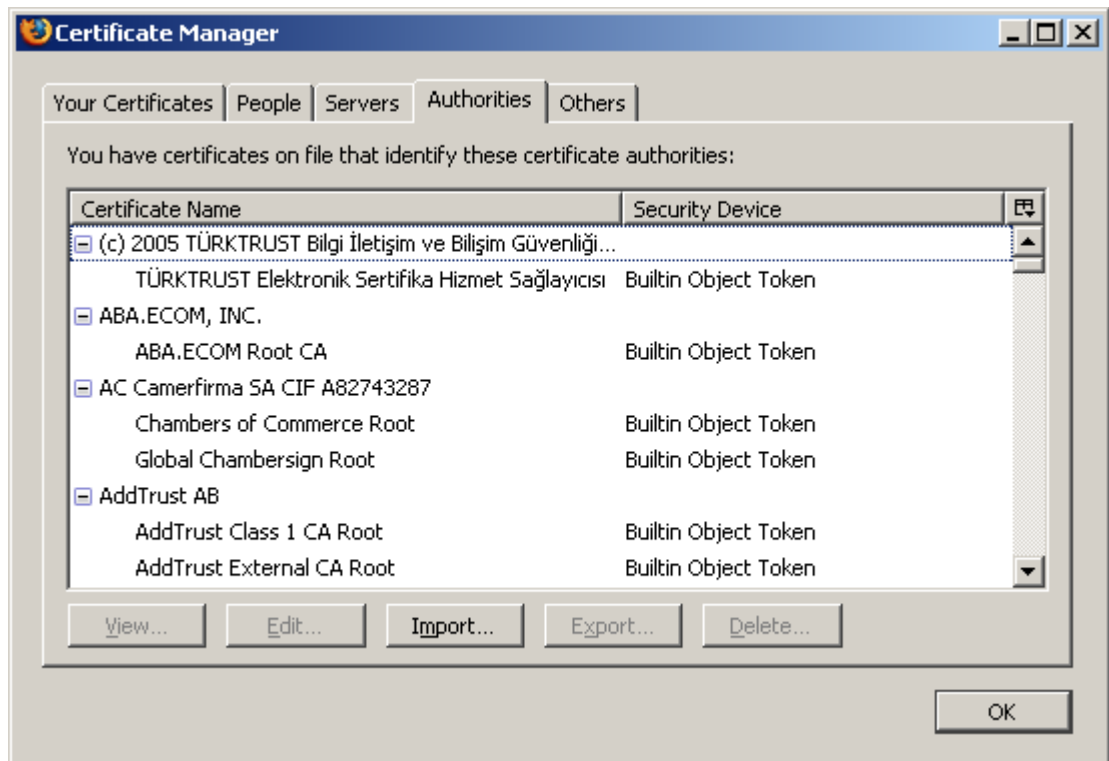

For Mozilla Firefox – Windows

Steps

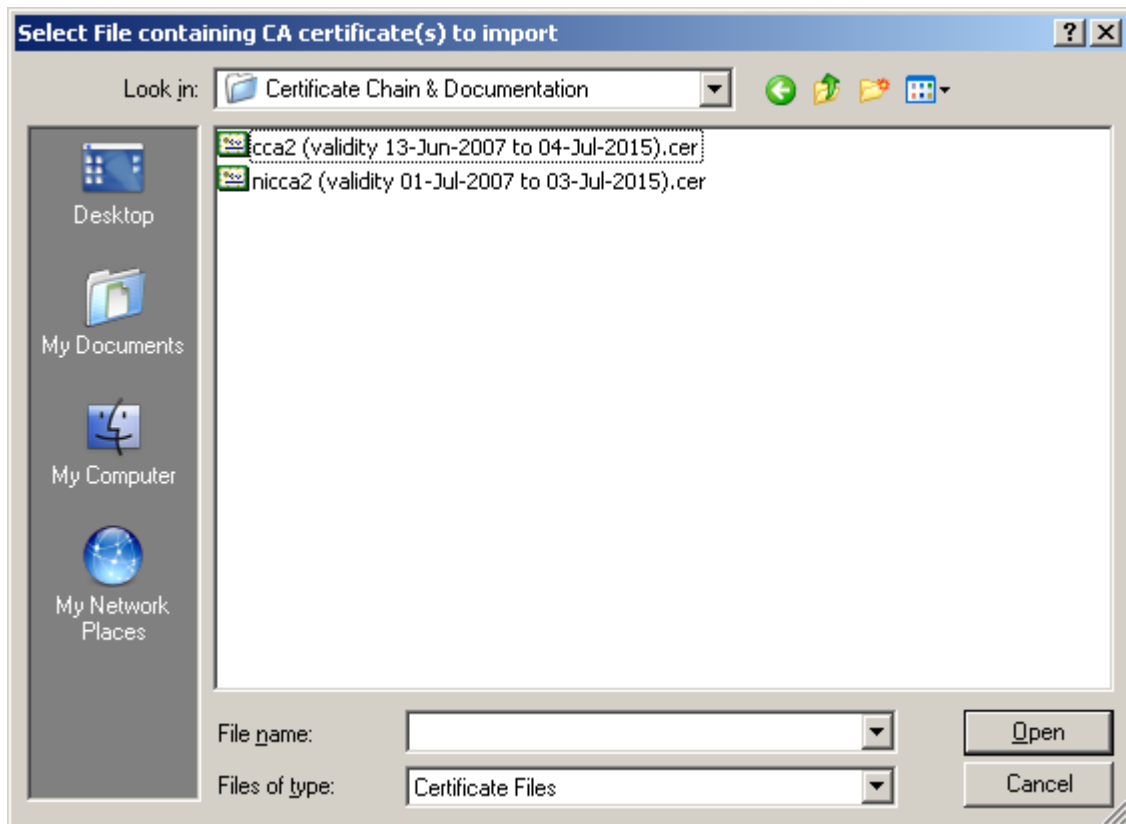

1. Download Certificates from <http://www.spark.gov.in/certchain.zip> and extract it to a folder
2. Open Mozilla FireFox and select **Tools** → **Options**
3. Select **Advanced** → **Encryption** and click on **View Certificates** button

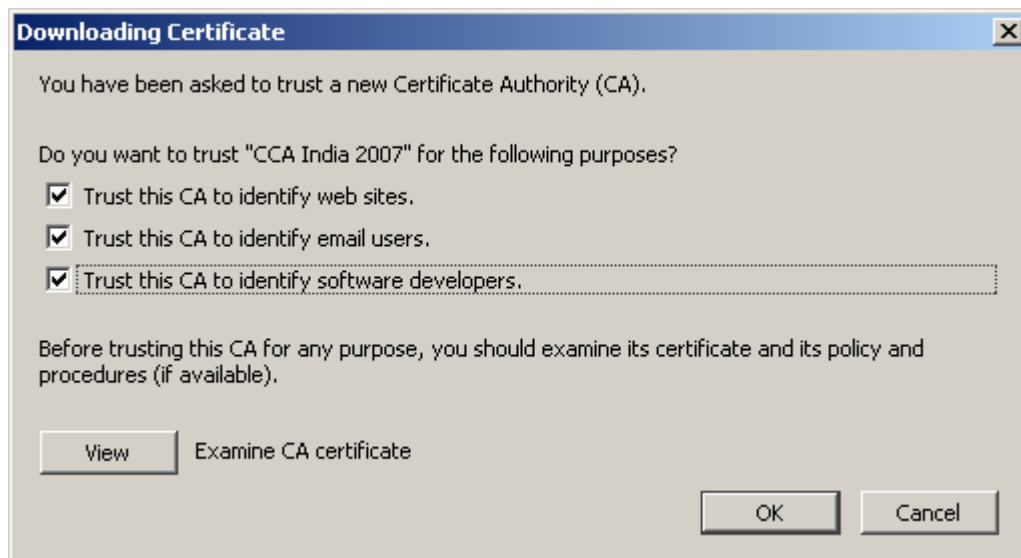

4. In the **Certificate Manager**, click on **Authorities** → **Import**

5. Select the first certificate file from the extracted folder

- check all the 3 check boxes and click OK

- Repeat the steps 3-6 for the second certificate file
- Certificate Installation completed.
Now you can access SPARK using Security Certificate
